Isando

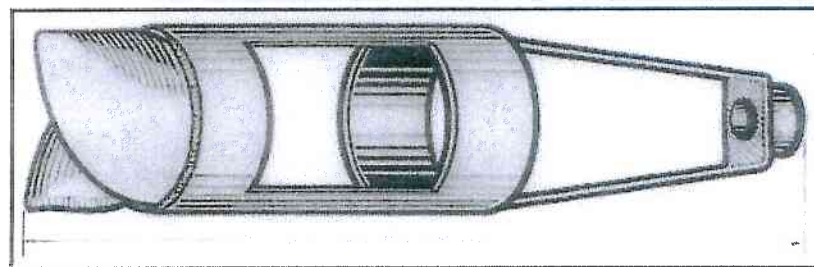

1600

A highly versatile general purpose auger, especially effective in hard and dry soils. These augers will drill into highly compacted soils with little difficulty.

- Standard thread coupling
- Tough, high-quality steel bail and barrel
- New design high carbon spring steel bits
- Unbeatable and unbreakable

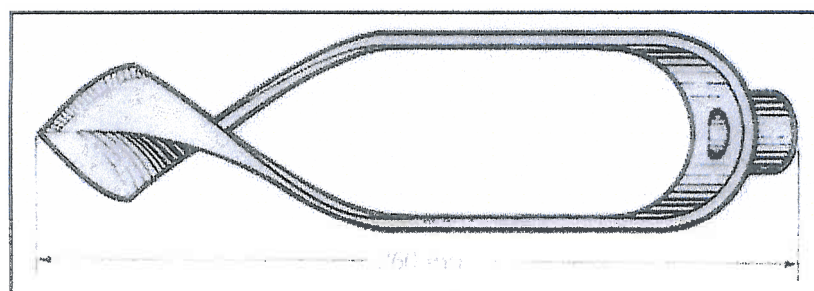

Standard diameter 75mm - others on request

Open-sided model for easy removal of clay soils

The most effective auger in moist and wet soils and the only auger for drilling in wet clays.

- Standard thread coupling
- Tough plate-steel head
- Machine stamped and formed
- Individually hand finished

Standard diameter 65mm - others on request.
